PROFESSIONAL SUMMARY

With 8 years of experience in creating clear software documentation, I help developers and users adopt and understand complex systems. Experienced in structured authoring and docs-as-code workflows, I collaborate with product teams to validate features through hands-on testing and translate technical concepts into quality documentation.

SKILLS

Authoring tools: MadCap Flare, PTC Arbortext Editor, XMetal Author, IXIA CCMS, Redocly, Confluence

Docs-as-code, API, & Design tools: VS Code (Markdown), Hugo, Docusaurus, Postman, Swagger, Figma, SnagIt

Standards & markup languages: DITA, XML, HTML, Markdown, LaTeX

Version control & platforms: Git, Perforce P4, TortoiseSVN, Jira, Azure DevOps

Code & AI: JavaScript, Go, Python, Prompt Engineering, SSO, RAG, Claude, GitHub Copilot

WORK EXPERIENCE

Technical Writer – Equitable (via IG)

October 2025 – Present

Canada, Waterloo

- Owned the documentation suite of multiple products, partnering directly with engineering teams and product owners to capture complex features and maintain accurate, up-to-date documentation.
- Reviewed API specifications, conducted validation testing using postman, and authored clear, developer friendly API documentation for internal platforms.
- Spearheaded the transition from legacy documentation practices to a modern docs-as-code workflow, deploying documentation to a Hugo based static site.
- Migrated legacy documentation to Markdown files using VS code, embedded files within code repos, and managed version control using Git.
- Designed and executed the information architecture for the documentation platform, defining clear content hierarchy and taxonomies.
- Implemented automated style guide lint checks and continuously drove process improvements by standardizing processes, identifying gaps, and introducing automation where possible.

Senior Technical Writer – OpenText

February 2023 – August 2023

India, Hyderabad

- Owned end-to-end documentation for two SaaS products, ensuring all documents remain accurate, current, and technically validated.
- Created and published a diverse content suite, collaborating with developers, PMs, and BAs to break down complex features, incorporate feedback, and deliver documentation within established release timelines.
- Verified features in the testing environment and attended product demos to ensure documentation reflects correct product behavior.
- Supported the migration of legacy documents to a DITA based structure using Arbortext Editor to streamline content, enable content reuse, and reduce redundancy.

- Validated the correctness of XML tags, managed version control using Perforce, and audited content to enforce style guide compliance.

Senior Technical Writer – Broadcom (via SqaureShift)
India, Hyderabad

August 2022 – February 2023

- Created, edited, and maintained an internal knowledge base across Confluence pages, ensuring information was accurately captured and structured for developers.
- Partnered with product and development teams to translate complex functionality into clear, user-centric documentation in the form of user guides, quick start guides, installation guides, and how-to guides.
- Conducted in-depth documentation reviews to revamp legacy documents ensuring functional accuracy and compliance with internal style guides.
- Authored and published developer-facing API reference documentation, validating RESTful endpoints via Postman to integrate precise multi-language code snippets and payloads.

Technical Writer – Infor
India, Hyderabad

January 2020 – July 2022

- Published online help from scratch for a new application, utilizing IXIA CCMS and a single-sourcing strategy for content reuse. Developed DITA maps to structure concept and task files.
- Led documentation for two additional ERP systems, owning the documentation suite and supporting quarterly release cycles. Mentored new writers on the product, writing standards, and authoring tools.
- Supported the implementation of Infor SmartHelp and context-sensitive online help, using metadata and tagging to ensure content was easily filterable by variant, user role, and version.
- Collaborated with cross-functional teams to analyze system enhancements, executed thorough functional checks in the testing environment to ensure documentation accuracy, and managed version control using TortoiseSVN.

Technical Writer – Cyient
India, Hyderabad

December 2016 – December 2019

- Translated complex technical information into clear, audience appropriate documentation.
- Created user manuals, quick-start guide, installation manuals, and release notes.
- Followed internal style guides and incorporated editorial feedback to maintain clarity, consistency, and high-quality standards in all deliverables.

EDUCATION

Algoma University – Canada
IT Project Management

September 2023 – April 2025

Singhania University – India
Bachelor of Science

August 2013 – July 2016

VOLUNTEERING EXPERINCE

Technical Writer (Subject Matter Expert) – PMI Standards+
Canada, Remote

January 2025 – December 2025

Volunteered to author and publish technical guides, knowledge base articles, and white papers on emerging technologies and methodologies. Utilized established templates and the Microsoft Manual of Style to write content based on minimalist writing principles, ensuring maximum consistency, accuracy, and readability across all deliverables.
